

Vistaweave
connect with the outdoors

Inspired by
Colorbond®

Colorbond®

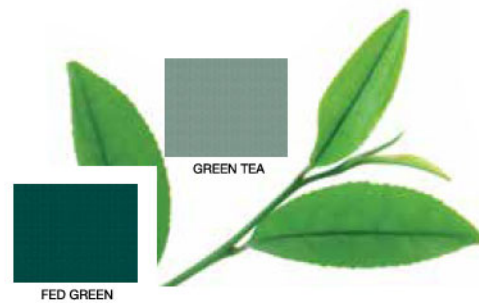

Vistaweave is inspired by the COLORBOND® colour range. The palette coordinates with any exterior to create a seamless finish. This offering caters for traditional colours such as CLASSIC CREAM®, PAPERBARK® and WOODLAND GREY® right through to the latest contemporary tones like DUNE®, WALLABY® and IRONSTONE®. Whether you want a splash of colour for a contrasting look or a perfect colour-coded match, the Vistaweave range is your perfect solution.

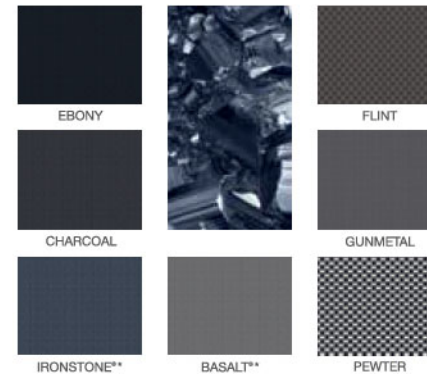

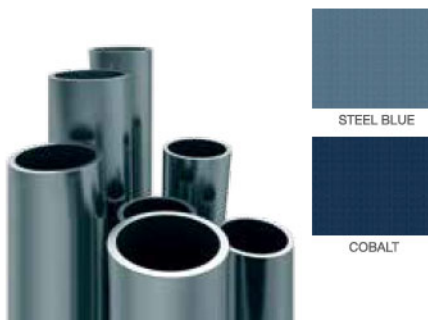

When selecting your screening fabric, consider the colours on your exterior such as the roof, guttering, bricks and other finishes. Every colour in the Vistaweave range will work harmoniously with the COLORBOND® exterior palette.

Whether you like a contrasting look using opposing colours, a similar tone for a subtle variation or an exact match for a uniform finish, the Vistaweave colour range can provide endless possibilities. Be creative and transform your outdoors.

Vistaweave blinds will create privacy from the outside without compromising the visual aspect.

Vistaweave 95 is a versatile woven mesh designed for blinds, awnings and general outdoor applications. The unique weave combines a functional solution for solar protection with a stylish textured appearance. ENVIRONMENTAL STATEMENT

Building an environmentally friendly product is a complex process. The Vistaweave outdoor blind & awning mesh range has been developed with a sense of social responsibility and commitment to the environment. From the manufacturing process through to product performance, consideration has been given to the products direct impact on the environment. Vistaweave meets some of the most stringent environmental requirements worldwide.

Production

Vistaweave is manufactured in a modern facility that is ISO 14001 certified. This is an international standard for Environmental Management Systems and the most common standard used worldwide. The standard sets out criteria and a framework for which the manufacturer must comply. In simple terms, ISO 14001 specifies a process for the control and continuous improvement of an organisation's environmental performance.

Product

All Vistaweave products comply with the U.S. Greenguard®, European Oeko-Tex® and Australian Eco-specifier® standards.

GreenGuard is a program that gives assurance the certified products are designed for use in indoor spaces and meet strict chemical emission limits, which then provides for healthy interiors.

Oeko-Tex is a standard for which textiles must not contain certain chemicals or additives. This standard has evolved over many decades and is typically useful for textiles that are in regular contact with people. There are hundreds of banned substances on the Oeko-Tex list that could be either harmful to humans or the environment long term.

Eco-specifier takes a cradle to grave approach for its certification. It analyses all aspects of the product including production, actual performance and post life recycling. Eco-specifier provides a thorough review before its products are labelled as compliant.

Performance

Vistaweave mesh is designed to be used in a solar protection application such as outdoor blinds and awnings. Its unique construction either absorbs or reflects a majority of the solar energy providing the environmental benefit of temperature control therefore improving air-conditioning efficiencies which in turn reduces the consumption of electricity.

Vistaweave
connect with the outdoors

A brand you can trust FOR THE AUSTRALIAN ELEMENTS

For more than 30 years Vistaweave has been a brand synonymous with the Australians outdoors. In fact, Vistaweave pioneered outdoor mesh fabrics in the Australian blind & awning market.

Vistaweave has resonated with consumers for decades due to its outstanding performance, exceptional quality and stylish appearance. Whilst these core features have remained constant over time, Vistaweave has evolved through innovation, utilising the most advanced technology available to provide performance and longevity. Vistaweave's unique construction and high density weave makes it the ideal choice for a variety of applications in both commercial and domestic environments.

Vistaweave is the benchmark for outdoor woven mesh and provides peace of mind for consumers in a market that is constantly changing. The current design was influenced as a result of a collaborative partnership with the iconic Colorbond® steel colour experts. The combination of traditional and contemporary colours provides the most comprehensive colour range available.

It's no surprise that Vistaweave is one of the most recognised and trusted brands in the industry. When people think of outdoor mesh, they think of Vistaweave.
